

Everyone wants to engineer products and systems more effectively.

PPI was founded to help organizations and individuals just like you discover and harness the power of systems engineering for problem definition and problem solving.

Overcome Your Challenges

We make it easy for you to develop products and systems more effectively!

We understand what it's like learning any new skill and how helpful sharing a relevant example from our diverse experience can be.

We understand the challenge of change and can help you bring new ideas into established organizations and power structures.

Whatever your development challenge, simply contact us and we'll put our resources and experience to work for you!

Empowering Partnerships

32 years, 42 countries, 20,000 professionals, and over 650,000 continuing education hours earned by attendees.

We deliver outstanding training and consulting to global enterprises, from Fortune 100 companies to small start-ups. We have personnel based in eight countries and clients across six continents benefiting from our work.
